ABOUT ME

Backend-focused Software Developer with hands-on experience building scalable, production-grade applications using **Spring Boot**, and the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**. Proficient in **Data Structures and Algorithms (DSA)**, **System Design**, **REST API** development, and **Microservices** architecture. Experienced in deploying and managing applications on **cloud infrastructure (AWS)**, with a strong focus on writing clean, reliable, and maintainable code.

EXPERIENCE

Software Developer Intern

January 2026 – July 2026

Gravity Engineering Services

Raipur, India

- Developed and maintained **10+** core modules of a CRM application used in production.
- Improved application performance and UI responsiveness, reducing load time by **15%** through frontend refactoring and changing assets.

Software Developer Intern

June 2025 – September 2025

Technolitics India

Raipur, India

- Designed and developed a cross-platform social community app using **Flutter** and **Dart**.

EDUCATION

Shri Shankracharya Institute of Professional Management and Technology

CGPA : 7.5

Bachelor of Technology in Information Technology

2022 – 2026

TECHNICAL SKILLS

Frontend: React.js, Flutter, JavaScript, HTML, CSS, TailwindCSS, Material-UI

Backend: Spring Boot, Node.js, Express.js, Firebase

Databases: MongoDB, MySQL, PostgreSQL

Languages: Java, JavaScript, Dart

Cloud & DevOps: AWS (EC2), Docker, GitHub Actions (CI/CD)

Tools & IDEs: Git, GitHub, Android Studio, VS Code

PROJECTS

API Change Notifier | *Spring Boot, GitHub Actions, PostgreSQL, React, JavaScript, Java*

[GitHub]

- Built an automated system using **Spring Boot** to detect breaking and structural changes in APIs by comparing JSON schemas.
- Integrated **CI/CD** checks using **GitHub Actions** to run schema validation on every pull request.

AI Roadmap | *React, JavaScript, Spring Boot, Java, MySQL, AWS EC2, Vercel*

[Live] [GitHub]

- Built a roadmap generation system using the **Gemini API** to create structured learning paths based on user input.
- Implemented a result caching strategy using **MySQL** to store previously generated roadmaps.

Public Issue Management System | *Spring Boot, Microservices, Cloudinary, REST APIs, MySQL, AWS*

[GitHub]

- Designed a **Microservices**-based backend architecture using **Spring Boot**, implementing **REST APIs** for creating issues, updating status, and fetching reports.
- Integrated **Cloudinary** for efficient image management, handling **Multipart requests** for visual evidence uploads.
- Implemented an automated notification service using **Java Mail Sender** for real-time status updates.

ACHIEVEMENTS

Ranked **4th** out of 150+ participants in **CODEX 2023** — an inter-college coding competition

Achieved a **LeetCode rating of 1730+**, solving over 350 Data Structures and Algorithms problems
